

## MEMORANDUM

To: Javier Cortes, U.S. Army Corps of Engineers, Jacksonville District  
Mark Reiss, EPA Region 2

From: Paul Berman, QA Officer, ANAMAR Environmental Consulting, Inc.

Date: June 9, 2011

Re: Laboratory Data and Data Tables for San Juan Harbor 103 Evaluation

Please find enclosed the draft submission of the laboratory data and data tables for San Juan Harbor. All laboratory data have been validated by ANAMAR and are considered to be final. The data tables are labeled draft pending comments by USACE and/or EPA. We apologize for the delay in sending the results, but an issue related to the analysis of PAHs in sediment prevented us from sending them any sooner. A complete explanation of the issue and its ultimate resolution are included in the case narrative of the sediment chemistry report on the attached DVD. Please feel free to contact me if you have any questions.
